PROCEEDINGS OF SOCIETIES

NEW YORK MINERALOGICAL CLUB

Regular Monthly Meeting of November 19, 1924

A regular monthly meeting of the New York Mineralogical Club was held in the East Assembly Room of the American Museum of Natural History on the evening of November 19th, at 8:15 P.M. The President, Dr. George F. Kunz presided, and there was an attendance of 25 members.

The committee on membership reporting favorably upon the names submitted at the October meeting, viz:—

Mr. G. Arthur Cooper, of Colgate University and Flushing, N. Y.

Mr. R. Norris Shreve, 50 East 41st Street, New York City.

These gentlemen were unanimously elected.

The recording secretary submitted to the membership committee the following names:—

Mr. Lewis W. MacNaughton, 654 Bergen Ave., Jersey City, N. J.

Dr. Paul F. Kerr, Department of Mineralogy, Columbia University.

The recording secretary reporting in behalf of the committee on the Hovey resolution read the following resolution which had been transmitted by the committee to Mrs. Hovey:—

“By the death on September 27th of Dr. Edmond Otis Hovey, the science of mineralogy has lost a valued exponent, and this organization an active and devoted member. Dr. Hovey, through the breadth and scope of his interpretation of his science, held a far closer grasp of mineralogy than many of his colleagues in geology. His many contributions to scientific literature were characterized by a painstaking conservatism which found expression in that clearcut accuracy of statement which is the essence of truth.

In the pursuit of knowledge he found no task too hard, no labor too strenuous, pursuing his investigations among the rigors of the arctic, and to the brink of an active volcano. The patience and courtesy with which he met the many calls upon his time and judgment will long be remembered by those who profited by recourse to his opinion, which was given with the same cheerful impartiality to the lowliest as to the greatest. It is the highest tribute that can be paid to the usefulness of any man in the world, that his loss is felt by so many of his fellowmen.”
