

INDEX TO VOLUME 55, 1970

The index for this volume attempts to combine the advantages of the content of the traditional subject index, with the computer storage and retrieval possibilities of the *KWIC* index that was used for volumes 52-54. This index is processed and printed from the input to the *Bibliography and Index of Geology*, under a contract arrangement with the American Geological Institute. Thanks are due them for their excellent cooperation in this initial venture. The content and layout of this index, and in particular the choice of subject headings, and subheadings, is still evolving. General comments and specific suggestions from users will be welcomed, and should be addressed to the Editor of *The American Mineralogist*.
