

Huntite from Deer Park, Victoria, Australia: a correction

WILLIAM F. COLE AND CHRISTOPHER J. LANCUCKI

*Division of Building Research, CSIRO

It has recently been brought to our attention by our colleague, Dr. A. Shayan, that in our paper on huntite from Deer Park (Cole and Lancucki, 1975) there is an error in the weight loss scale of Figure 3 of that paper. The values given on the weight loss

axis are in fact chart units and the true weight loss (%) is given by (chart units -5) \times 0.82. This correction has been made in Figure 1. The total weight loss is 45%, a little less ($\sim 5\%$) than that shown by chemical analysis.

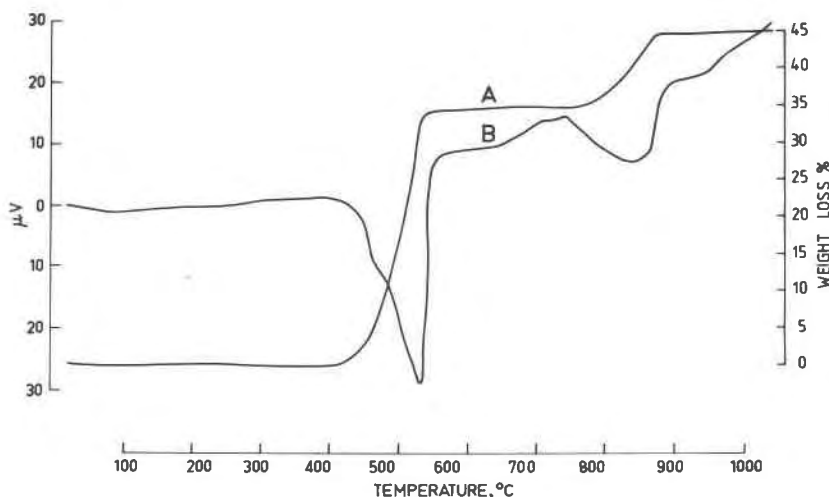

Fig. 1. Combined weight loss (A) and differential thermal analysis (B) curves of huntite from Deer Park.
