

## ERRATUM

**Thermodynamic studies of zeolites: Heulandite** by G. K. Johnson, H. E. Flotow, P.A.G. O'Hare, and W. S. Wise (v. 70, p. 1065–1071). In Table 5,  $\Delta H$  for Reaction 11 should be  $-(1096.16 \pm 0.15)$  kJ/mol. As a result,  $\Delta H_f^\circ$  and  $\Delta G_f^\circ$  of heulandite at 298.15 K should be  $-(10594.6 \pm 10.2)$  and  $-(9779.1 \pm 10.2)$  kJ/mol, respectively, and each entry for  $\Delta H_f^\circ(T)$  and  $\Delta G_f^\circ(T)$  in Table 7 should be more negative by 103.5 kJ/mol.
