PROCEEDINGS OF SOCIETIES

PHILADELPHIA MINERALOGICAL SOCIETY

Academy of Natural Sciences of Philadelphia, January 11, 1923

A stated meeting of the Philadelphia Mineralogical Society was held on the above date with the president, Mr. Vaux, in the chair. Twenty members and one visitor were present.

Mr. Samuel G. Gordon addressed the society on "A MINERALOGICAL TRIP TO NORTH CAROLINA," in which localities in Mitchell, Avery, and Macon counties were described. The talk was illustrated with lantern slides.

Mr. Vaux called attention to some extraordinary specimens of descloizite exhibited from Grootfontein, in Southwest Africa, which consisted of magnificent groups of reddish-brown bipyramidal crystals measuring up to one cm. in diameter.

SAMUEL G. GORDON, *Secretary*.
