

**FIGURE 1.** Back-scattered electron images of the run-products at low 150–180 (left), intermediate 500 (center) and high 800–1000 (right) magnifications. Run-product RN3 is not shown, however its texture is similar to samples RN4 and RN7. The solid scale bar corresponds to 10  $\mu\text{m}$ , whereas the broken scale bar corresponds to 100  $\mu\text{m}$ . Magnesium content decreases from top to bottom.

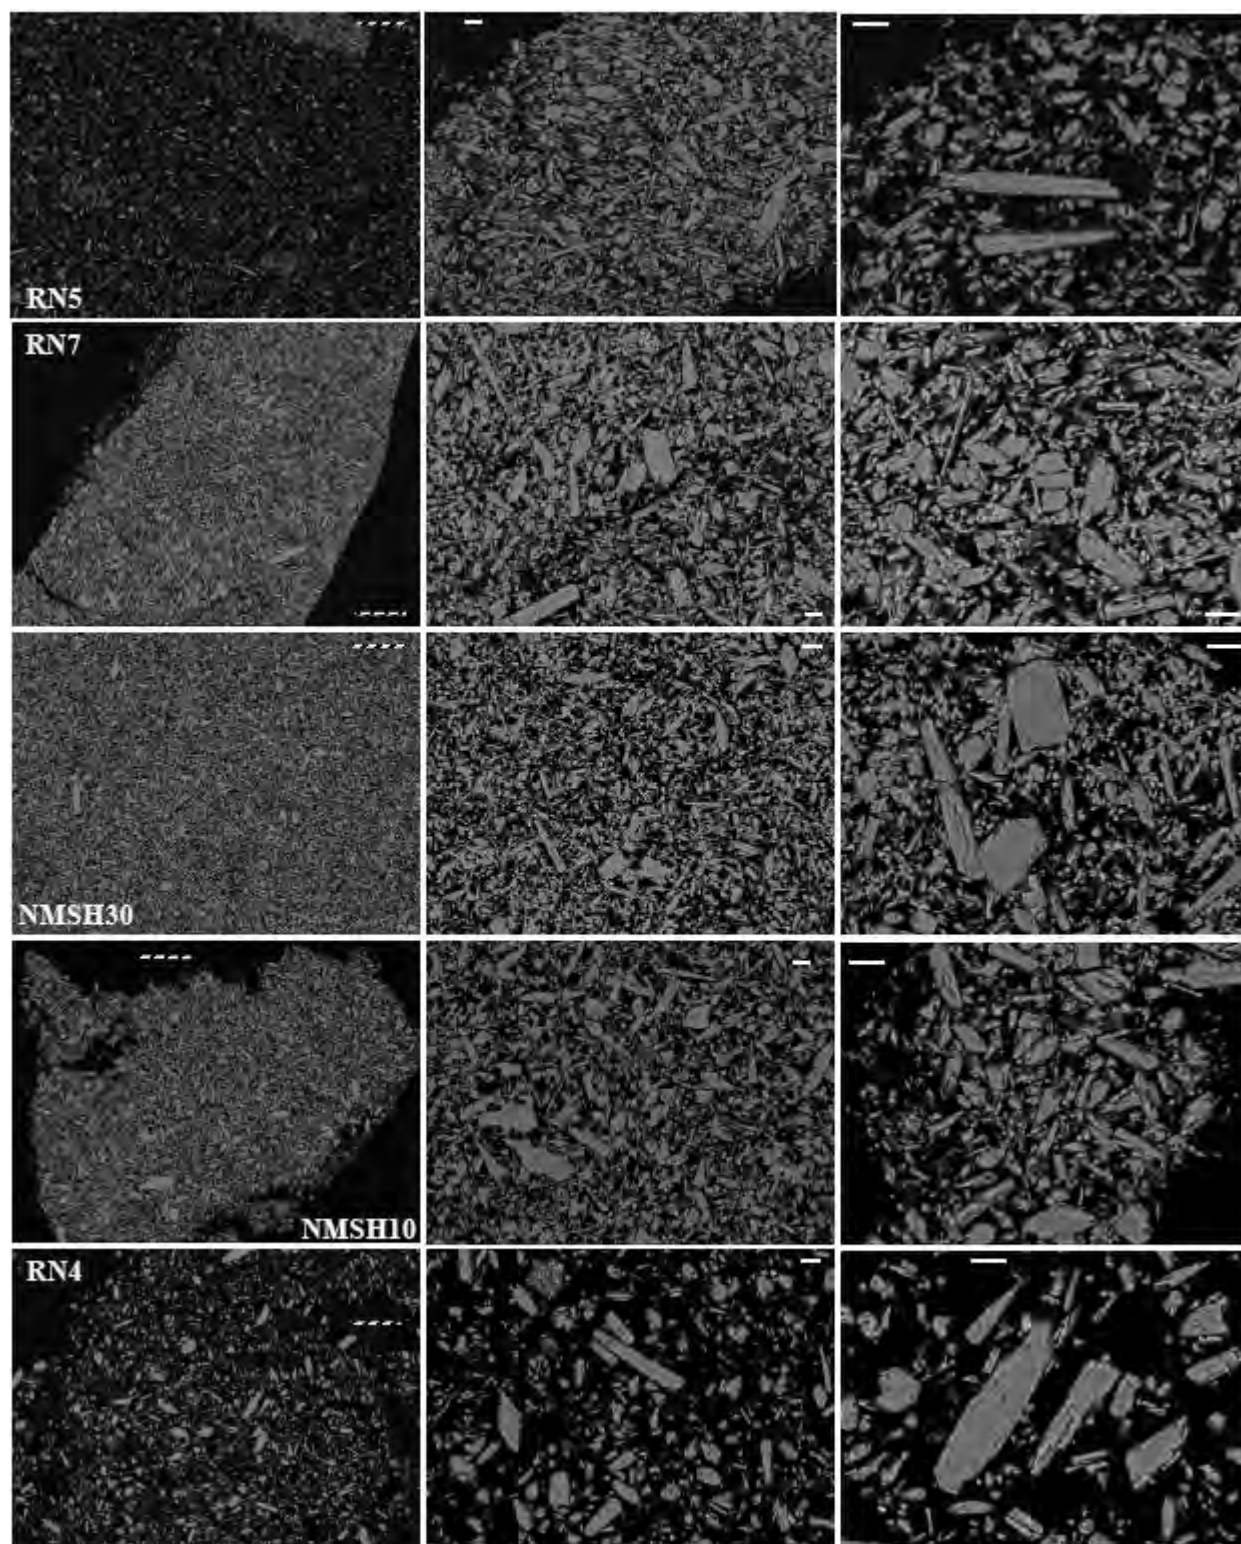

FIGURE 1—CONTINUED. Back-scattered electron images.
