The Gibbs free energies and enthalpies of formation of U⁶⁺ phases: An empirical method of prediction, by Fanrong Chen, Rodney C. Ewing, and Sue B. Clark (v. 84, 650–664, 1999).

The formula and constituent structural components for phosphuranylite in Table 1 should read:

The listing of constituent structural components for francevillite in Table 1 should replace ${}_2\text{Ur}\phi_5$ with $2\text{Ur}\phi_5$.

In Table 2, in the listing for $(\text{UO}_2)_2\text{SiO}_4 \cdot 2\text{H}_2\text{O}$, in the column under ΔG , the value should read -3653.0 ± 2.8 .
